

FOSSEE Summer Fellowship 2022 Report
ON
DRUPAL (Web Development)

**RESPONSIVE IMAGE GALLERY FOR FOCAL
(Inkscape, Synfig Studio)**

Submitted By

Priya Singh

(B.Tech Electrical Engineering
Bundelkhand Institute of Engineering and Technology, Jhansi, Uttar Pradesh
,India)

Under the guidance of:

**Prof. Kannan M. Moudgalya
Chemical Engineering
Department IIT Bombay**

From 20th April 2020 to 1st June 2020

Acknowledgments

I am highly indebted to Professor Kannan M Moudgalya, IIT Bombay for making it possible for me to have the opportunity to work on this project. I would like to extend my sincere thanks to my mentors- Mr. Khushalsingh K. Rajput (FOCAL Lead and Sr. Software Engg. FOSSEE, IIT Bombay) - without whom this project would not have been possible. He has provided his constant guidance and supervision throughout the project. I thank him for his support. I would also like to express my gratitude towards my co-interns for their kind cooperation and encouragement which helped me in the completion of this project.

5-Manage Form display of 'File Repository'

6- Creating View for Inkscape and Synfig studio

7- Manage display of 'File Repository'

8- Use of CSS injector to style to node pages.

9-Refernces

INTRODUCTION

Drupal is a free, open-source content management system (CMS) with a large, supportive community. This guide is for people who are just sorting out what Drupal is and what you can do with it. It focuses on resources that provide an informative overview instead of hands-on tutorials. It is designed to give some context and history of the Drupal project, along with the major concepts involved in building a site with it. If you want to begin learning Drupal hands-on, the best start is the Drupal 8 User Guide, which walks you through the foundations of working with Drupal.

ABOUT PROJECT

AIM:

Our goal is to implement responsive web Image gallery and provide a new look to the existing FOCAL website and its image gallery . Also, we use DRUPAL 9 CMS in order to give our project a shape, which is open source and has a large community support. In addition to it it has a lot of contributed modules which makes our life easy and thus give a touch of perfection to our website.

ABOUT FOCAL:

FOCAL (Free and open-source creative art library) is an initiative by FOSSEE, IIT Bombay. This is a project from the Open Source Community, which aims at providing ample opportunity and platform for students and technicians to use open source softwares for Computer Graphics.

OBJECTIVE:

- To encourage students and entrepreneurs to use Open Source Software in computer graphics.

- To promote the learning of open-source graphics and animation software, like
 - Inkscape (cross-platform open-source vector design software)
 - GIMP (cross-platform open-source photo/image editing software)
 - Scribus (cross-platform open-source desktop publishing software)
 - Synfig Studio (cross-platform open-source 2d animation software)
 - Blender (cross-platform open-source 3d animation software)

- To publish users' artwork/computer graphics design in Open Source.

CONTENT :

Our website basically contains five main content types which correspond to each of the open source animation softwares i.e. Inkscape, Blender, Scribus, Synfig studio and GIMP. Each of the content types contains respective fields such as rendered artwork , creator name , links for tutorial and softwares, video samples along with title , introduction and some short notes. Each of the content type has a gallery of its own where thumbnails of the artworks and their samples are rendered in a responsive 3 x 3 layout. These gallery views have a menu link in the main navigation. Our website also contains quick links, contact information, disclaimer and social media links in the footer region. Whole website is clean and eye-catching. On the top of our home page we have presented a carousel (slideshow) of some of the artworks which gives a glimpse into the samples and content inside. At last, there are few blogs concerned about

various softwares and their related artworks They describe the experiences people have shared using some of these FOCAL based softwares.

MODULE USED

Following are the modules which need to be downloaded while creating responsive image gallery .

1- View Module

https://www.drupal.org/project/views_bootstrap/releases/8.x-4.3

views_bootstrap 8.x-4.3

Install

Works with Drupal: ^8 || ^9

```
$ composer require 'drupal/views_bootstrap:^4.3'
```

Using Composer to manage Drupal site dependencies

Alternative installation files

[Download tar.gz](#) 16.45 KB

[Download zip](#) 28.49 KB

2- Asset Injector

https://www.drupal.org/project/asset_injector/releases/8.x-2.10

asset_injector 8.x-2.10

Install

Works with Drupal: ^8.8 || ^9 || ^10

INSTALLATION OF MODULE

- 1- In the Manage administrative menu, navigate to Extend, click on install new module .
- 2- select o browse and upload .tar.gz file of view module .
- 3- select install.
- 4- click on administration page.

CREATE A CONTENT TYPE

STEPS :

1- In the Manage administrative menu, navigate to Structure, and select *Content type* . The *Content type* page appears.

2- Click on *Add content type*, and *Add content type* page appears.

Name *

File Repository Machine name: inkscape_file_repository

The human-readable name of this content type. This text will be displayed as part of the list on the *Add content* page. This name must

Description

this is content type for uploading the inkscape file

This text will be displayed on the *Add new content* page.

Submission form settings

 Required

Explanation or submission guidelines

This text will be displayed at the top of the page when creating or editing content of this t

3-In Name [insert name] ,here i put “File Repository”, add little bit of description in Description box .

4-Make following changes in Publising Options

Submission form settings
Title

Publishing options
Published, Promoted to front page, Create new revision

Display settings
Display author and date information

Menu settings

Default options

Published
 Promoted to front page
 Sticky at top of lists
 Create new revision

Users with sufficient access rights will be able to override these options.

[Save content type](#) [Delete](#)

5-Make following changes in Menu Setting.

Submission form settings Title	Available menus <input type="checkbox"/> Administration <input type="checkbox"/> Footer <input checked="" type="checkbox"/> Main navigation <input type="checkbox"/> Tools <input type="checkbox"/> User account menu The menus available to place links in for this content type.
Publishing options Published, Promoted to front page, Create new revision	Default parent item <main> ▼ Choose the menu item to be the default parent for a new link in the content authoring form.
Display settings Display author and date information	
Menu settings	

And left everything as it is.

6- click on Save and Manage Field .

7- click on *Add field* and start adding following fields.

- I. Rename body as **Description of file** with field type (text, formatted long with summary)
- II. **Download Editable File** —type: file
Allowed file extensions: svg, txt, zip
File directory : [date:custom:Y]-[date:custom:m]
- III. **Download latest version**— type : link
Check on required field
Allowed link type:Both internal and external links
Allow link text: required
- IV. **Fixed_content** —type : text (formatted ,long)
Click on edit
Check required field
In default value :
Select *source* and text format : *full html*
And write this -----

```
<hr style="border: 0; height: 2px; background-color: #000000;" />
<p>* Download the zip file. Unzip it and edit <br/>
* It is illegal to use registered logos in your project without terms and conditions
and the owner's permission.</p>

<hr style="border: 0; height: 2px; background-color: #000000;" />
```

Click on save setting

V- **Horizontal line** —type: text(formatted)

Click on edit

Check required field

In default value :

Select *source* and text format : *full html*

And write this -----

```
<tr> <hr style="border: 0; height: 2px; background-color: #000000;" /> </tr>
```

Click save setting

VI. **Thumbnail Image** —type: image

Allowed file extension :png, gif, jpg, jpeg

File directory :[date:custom:Y]-[date:custom:m]

Uncheck enable alt field

Uncheck title field

Click save setting

VI- **Tutorial-Link** — type :link

Check on required field

Allowed link type:Both internal and external links

Allow link text: optional

Click save setting

Manage fields ☆

Edit Manage fields Manage form display Manage display

CREATE TAXONOMY

STEPS

1- In the Manage administrative menu, navigate to Structure, and select *Taxonomy* . The *Taxonomy* page appears.

2- Click on *Add Vocabulary* and *Add Vocabulary* page appears.

3- In Name [insert name] , here i put “Artwork”. And add description in description box. And click on save .

4- Now click on *List terms* , Artwork [inserted name] page opens up.

5- click on *add term* and start adding following terms.

- I. blender URL alias →/focal/blender
- II. gimp URL alias →/focal/gimp
- III. inkscape URL alias →/focal/inkscape
- IV. scribus URL alias →/focal/scribus
- V. synfig URL alias →/focal/synfig

6- click on save

IMPORTANT : Now add this Taxonomy Term in Field of File repository

7- In the Manage administrative menu, navigate to Structure and click on content types and click on File Repository .

8- click on Add field

Add a new field : Taxonomy Terms

Label: Type of Artwork

Type of item to reference: taxonomy term

Allowed number of Values: limited

9- click on save field setting

10- Once again go to Manage administrative menu, navigate to Structure and click on content types and click on File Repository .

11- Click on Manage Fields and navigate to manage form display and click on Type of Artwork and *select Radio button/check boxes*.

12- Now click on save button.

CREATING A VIEW

I- INSTALL VIEW MODULE :

- 1- In the Manage administrative menu, navigate to Extend
- 2- search view and check the box of Views Bootstrap 4 ,and click on install.

II- VIEW FOR INKSCAPE GALLERY

STEPS

- 1- In the Manage administrative menu, navigate to Structure, click on *Menu*.
- 2- click on Add view ,Add view page opens up
- 3- set as following :

- I. *View name* : Inkscape
- II. *View Setting* : **show** → content , **of type** : file Repository
- III. *Page setting* :
 - Check on click on page
 - *Page title*: Inkscape
 - *Path*: Inkscape*Page display setting*
 - *Display format* : bootstrap grid
 - *Item to display* :9
 - Check on use a pager
 - Create a menu link
 - Menu → navigation link

IV. Save and edit

- 4- Now Inkscape (content) page opens up
- 5- Go to FORMAT
 - I- Go to Format → setting

page: Style options

Grouping field Nr.1

- None -

You may optionally specify a field by which to group the records. Leave blank to not group.

Row class

test1

The class to provide on each row. You may use field tokens from as per the "Replacement patterns" used in "Rewrite the output of this field" for all fields.

Add views row classes

Add the default row classes like views-row to the output. You can use this to quickly reduce the amount of markup the view provides by default, at the cost of making it more difficult to apply CSS.

Column width of items at 'xl' breakpoint

None (or inherit from previous) ▼

Set the number of columns each item should take up at the 'xl' breakpoint and higher.

Apply

Cancel

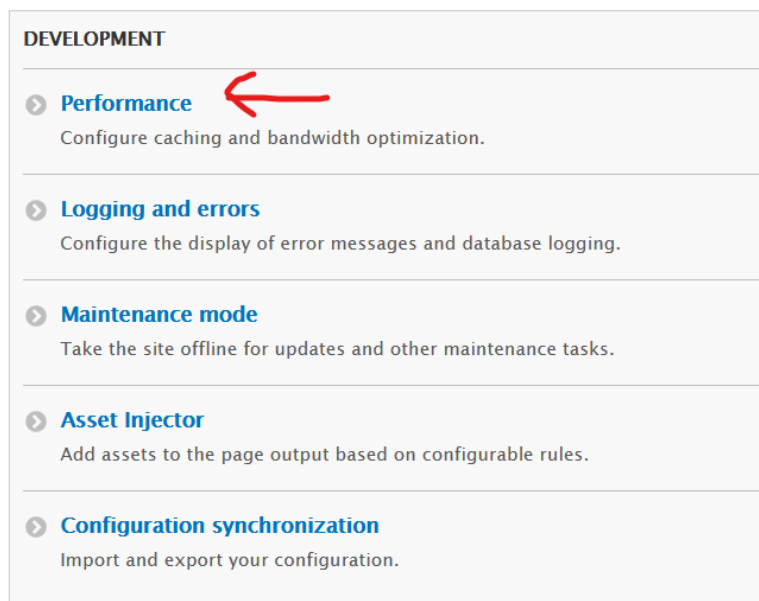

- Now click on Apply .
- Now goto Htdocs folder in your system ,open you folder in which you've installed Drupal 9 ,click on theme folder and then click on Bootstrap folder and then go “ style.css” file ,open in editor and put these following codes.

```
.test1 {  
  /* background-color: green; */  
  /* border-style: solid; */  
  border:solid black 1px;  
  margin:5px;  
  padding:10px 5px 10px 5px;  
  text-align: center;  
}  
.test1 .field-content{  
  margin:15px  
}
```

- And also make change in existing classes by searching them as follows:

```
.col-lg-3 {
  flex: 0 0 auto;
  /* width: 25%; */
  width:32%
}
.col-md-4 {
  flex: 0 0 auto;
  /* width: 33.33333333%; */
  width: 48%;
}
.col-sm-6 {
  flex: 0 0 auto;
  /* width: 50%; */
}
.col-12 {
  flex: 0 0 auto;
  width: 100%;
}
```

- Now In the Manage administrative menu, navigate to Configuration , click on performance

- click on clear cache and then click on save configuration

▼ CLEAR CACHE
Clear all caches

▼ CACHING
Browser and proxy cache maximum age
<no caching>
This is used as the value for max-age in Cache-Control headers.

▼ BANDWIDTH OPTIMIZATION
External resources can be optimized automatically, which can reduce both the size and number of requests made to your website.
 Aggregate CSS files
 Aggregate JavaScript files

Save configuration

II- Go to FORMAT → show : field → setting → check on provide default field wrapper elements

Inline field : check on content :title

Click on apply

page: How should each row in this view be styled

- Content
- Fields
- Search results

You may also adjust the [settings](#) for the currently selected row style.

Apply

Cancel

page: Row style options

- Provide default field wrapper elements

If not checked, fields that are not configured to customize their HTML elements will get no wrappers at all for their field, label and field + label wrappers. You can use this to quickly reduce the amount of markup the view provides by default, at the cost of making it more difficult to apply CSS.

Inline fields

- Content: Title
- Content: Thumbnail Image

Inline fields will be displayed next to each other rather than one after another. Note that some fields will ignore this if they are block elements, particularly body fields and other formatted HTML.

Separator

The separator may be placed between inline fields to keep them from squishing up next to each other. You can use HTML in this field.

- Hide empty fields

Do not display fields, labels or markup for fields that are empty.

Apply

Cancel

III-Click on Add in front of FIELDS, search thumbnail image in search box.

- Thumbnail image → image style → medium (200*200)
- Link image to→ content
- Style setting : check on add default classes
- Click on apply

IV- Click on FILTER search “content type” → operator (select is on of) and content types →(select file repository) →Click on apply .

V- Click on FILTER search “Type of ArtWork” → Vocabulary → artwork Selectiontype → autocomplete

Now Inkscape (content) page should be look like this

The screenshot shows the 'Displays' configuration page for a content type named 'Inkscape'. The interface is organized into several sections:

- TITLE:** Title: [Inkscape](#)
- FORMAT:** Format: [Bootstrap Grid](#) | [Settings](#). Show: [Fields](#) | [Settings](#)
- FIELDS:** Content: [Title](#), Content: [Thumbnail Image](#). Includes an 'Add' button.
- FILTER CRITERIA:** Content: [Published \(= Yes\)](#), Content: [Content type \(= File Repository\)](#), Content: [Type of ArtWork \(= Inkscape\)](#) | [Settings](#). Includes an 'Add' button.
- SORT CRITERIA:** Content: [Authored on \(desc\)](#). Includes an 'Add' button.
- PAGE SETTINGS:** Path: [/inkscape](#), Menu: [No menu](#), Access: [Permission](#) | [View published content](#)
- HEADER:** Includes an 'Add' button.
- FOOTER:** Includes an 'Add' button.
- NO RESULTS BEHAVIOR:** Includes an 'Add' button.
- PAGER:** Use pager: [Mini](#) | [Mini pager, 9 items](#), More link: [No](#)

At the bottom, there are 'Save' and 'Cancel' buttons. A 'View page' button is also visible in the top right corner.

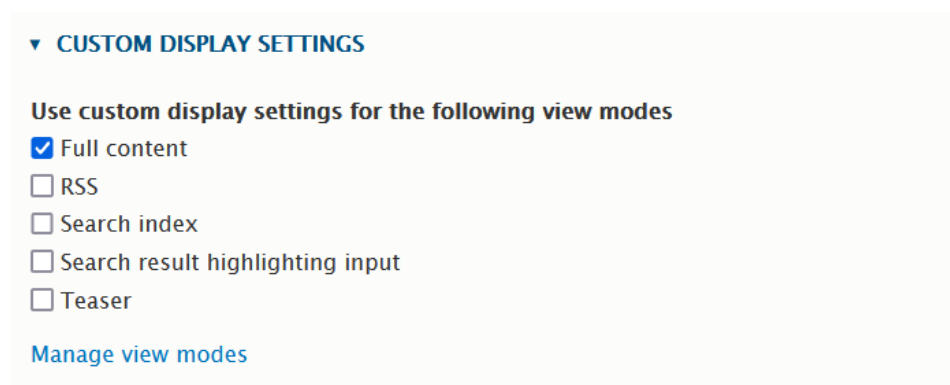

Similarly create a view for synfig studio.

MANGE DISPLAY OF FILE REPOSITORY

STEPS

1- In the Manage administrative menu, navigate to Structure, and select Content type, and go on File Repository row, click on *Manage Field* and then click on *Manage display*.

2- Click on “CUSTOM DISPLAY SETTING” and check on only full content

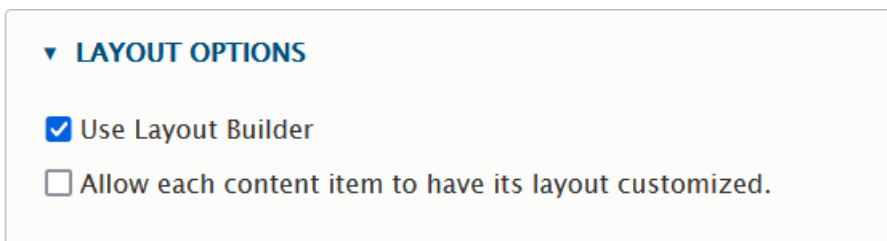

▼ CUSTOM DISPLAY SETTINGS

Use custom display settings for the following view modes

- Full content
- RSS
- Search index
- Search result highlighting input
- Teaser

[Manage view modes](#)

3- Check on Use layout Builder

▼ LAYOUT OPTIONS

- Use Layout Builder
- Allow each content item to have its layout customized.

4- click on save

5- Now Manage Display opens up and click on “ Full content”

6- Mark check on Use layout builder and click on save and new page opens and then click on “ Manage Layout”

7- click on cross on configure section

8- click on Remove on right side

9-Now click on “Add section ”

10-Click on Two column on right side

11-Now click on Add Section

12- Now it looks like following

13-In left column : add block → Thumbnail image

In right column →add block → Description of file , Fixed content,Download latest version ,Tutorial link,Horizontal line ,Download editable file

14- Now click on save layout

USE OF CSS INJECTOR(ASSET INJECTOR) FOR STYLING NODE PAGE

STEPS

1- INSTALL ASSET INJECTOR MODULE :

- In the Manage administrative menu, navigate to Extend
- search Asset and check the box of Asset Injector ,and click on install.

2- In the Manage administrative menu→development →asset injector →css injector→ add css injector ,and new pages opens up .

3-setup following things:

- label— node
- advanced options - media –all
- content types- file repository
- pages- /node/* , check on Show for the listed pages
- condition requirements -check on Require all conditions

4 - In code section add following things

```
.layout {  
width: 85%;  
margin: auto;  
background-color: lightyellow;  
padding-top:12px ;  
}
```

```
.img-fluid {  
  
  max-width: 100%;  
  height: auto;  
}  
.layout__region--first .field__label {  
  display:none;  
}
```

```
.field__item {  
  margin-left:20px;  
  margin-right:20px;  
}  
.region-content {  
  padding-left:10%;  
  padding-right:10%;  
}  
.col-sm-6 .region-content {  
  padding-left:7%;  
  padding-right:7%;  
}
```

```
.layout__region--second {  
  margin-top:10px;
```

```
}  
.page-title{  
  background-color:#f3eedf;  
  margin-top:12px;  
}  
.container{  
  max-width:1520px;  
}  
.node__meta{  
  display:none;  
}  
.node__content{  
  
  padding-top:8px;  
}  
  
@media screen and (max-width: 840px) {  
  body {  
    background-color: white;  
  }  
  .region-content {  
    padding-left: 5%;  
    padding-right: 5%;  
  }  
  .layout {  
    width: 90%;  
    margin: auto;  
    background-color: lightyellow;  
    padding-top: 12px;  
  }  
}
```

```
.block-field-blocknodeinkscape-file-repositoryfield-fixed-content
.field__label {
  display:none;
}
.field--name-field-horizontal-line .field__label {
  display:none;
}

@media screen and (max-width: 638px) {
.layout__region--second {
  margin-top: 10px;
  margin-left: 20px;
}
}

.field--name-title {
  color:#004ec4;
}
```

REFERNCES

For summing up the report the following resources were of great help , thus the above listed sites and links are truly up for consideration in order to build a website.

1. Drupal.org
2. Spoken Tutorials
3. Drupal Stackexchange
4. Ostraining
5. Modules Unraveled
6. Youtube
7. Drupalize.me
